The advanced Industrial Arts class under the direction of Mark Smith has just completed an entire cherry wood kitchen for me . Their workmanship, attention to detail, work ethic and the finished product is exceptional. We are more than pleased. We are thrilled to have found this talented teacher and this program that teaches really useful skills to teens. The teens came to my home only once but they were all business, had everything planned and didn't forget anything they needed to complete their work. Mark was remarkable in his ability to guide his students so that they did a professional job of installation in one day. Only minor touches were needed to finish the job.

I have told many friends about their wonderful program and Mark's masterful leadership of this class. In addition to the kitchen, they made me a matching clock and footstool which I cherish. I realize the quality I received cost me less than half what comparable solid wood cabinet doors would have cost in the open market. I appreciate that advantage too.

Please pass on my gratitude to Mark for his tireless work and quality product. You are to be commended for funding a most worthwhile program.

Sincerely,

Beverly Bennett
